Academic Projects

Project Title: Disciplinary Committee Management
Domain: OJDBC, Servlet, Html, Css
Description: It stores the information of the student who are not came with dress code and transfer that data through admin, and providing the result in statics way for each month

Project Title: Super Market Billing System
Domain: Java

Description: Supermarket is the place where customers come to purchase their daily using products and pay for that. So there is a need to calculate how many products are sold and to generate the bill for the customer.

Project Title: Train Ticket Booking Management System
Domain: C
Description: We had designed a project which provides services like – ticket booking, ticket cancelation, booking status

Project worked on:

Role: System Engineer
Responsibilities: I worked on updating Hybris tool for Edgewell client the project used to be in Hybris version 6.4 we updated it to the 2011. I verified the custom code with the version suites and updated each version till 2011. I used to verify the methods because of updating the project from version to version it would get deprecate so I will verify those methods and replace them with latest methods in the new version.

We implemented back office extension so that business team will view/verify the data.
